

Nevada Nursery Law

Questions are based upon Peggy McKie's lecture and associated handouts.

24. Nevada Revised Statutes NRS 555.236 requires that any person, including a landscape contractor who provides nursery stock to their clients must obtain what? (2pts)

25. Which state agency is responsible for regulating the sale and movement of nursery stock into and within Nevada? (1pt)

26. Under Nevada state laws what, in addition to trees, shrubs, perennials and annuals, does the definition of "nursery stock" include? (3pts)

27. Do landscapers who purchase all of their nursery stock from local retail nurseries have to get a nursery stock dealer license? Why or why not? (3pts)

28. Name two pests which have been introduced and spread via nursery stock. (2pts)

29. A shipment of nursery stock coming into Nevada must be accompanied by what? (2pts)
30. Are you required by state law to take good horticultural care of nursery stock? (1pt)
31. Nevada state law requires that nursery stock damaged by environmental or mechanical damage be removed from sale. Name three conditions considered to be mechanical damage. (3pts)
32. State-listed noxious weeds are species that have been given special regulatory significance because they are difficult to control. If a noxious weed is found infesting nursery stock, name three actions that state may take. (3pts)
